Projects

Project

computed / read-only

workspaces: List<String>
- Derived from Space → Zone
- Display only (not stored)

Kamil

id	UUID, wymagane, unikalne
project_name	String, wymagane, unikalne np. “Product Redesign”
project_status	Enum, wymagane (In Progress, Completed, Idea)
project_summary	String, opcjonalnie, krótki opis projektu
project_keywords	List<String>, opcjonalne
project_strategy_url	URL, wymagane (Notion)
#key_resource (1:N)	
#artifact (1:N)	
created_at	DataTime, auto
updated_at	DataTime, auto
#space_id (N:1)	

Key Resource

id	UUID, wymagane, unikalne
resource_provider_type	Enum, wymagane (Notion, Figma, Github, Other)
resource_label	String, wymagane (“Source of Truth”, “Frontend Respository”)
resource_url	String, wymagane (“Source of Truth”, “Frontend Respository”)
resource_icon	String, opcjonalne
#project_id (N:1)	UUID, wymagane, foreign key Należy do projektu
created_at	DataTime, auto
updated_at	DataTime, auto

Artifact

id	UUID, wymagane, unikalne
artifact_name	String, wymagane (JTBD Analysis Report)
artifact_source_path	String, wymagane (discovery/jtbd-research-flow)
artifact_deliverable_url	URL, wymagane (Link do pliku lub dokumentu)
workspace_domain	String, opcjonalne (Discovery, Design)
artifact_approval_status	Enum, wymagane (Draft, In Review, Approved)
#approved_by_user_id	UUID, opcjonalne, fk
artifact_approved_at	DateTime, opcjonalne
#project_id (N:1)	UUID, wymagane, foreign key
created_at	DataTime, auto
updated_at	DataTime, auto
